Abstract (en)

A machine for filling containers, in particular bottles, comprising a series of filling groups (21), each of which includes one thin internal tube or cannula (24A), which effects the preloading of a gasket (27) situated in the outlet nozzle (28) by using a spring (39); each filling group (21) also comprises one adduction cannula (24) for the passage of the liquid to the container, concentric with the internal cannula (24A). <IMAGE>
