Abstract (en)

[origin: EP1229287A1] A system (1) for monitoring and managing data related to motor machines comprises: a unit (7) for picking-up lubricant samples for mechanical members from a motor machine; an analysis unit (8) of said lubricant samples, apt to perform measurement of data related to a plurality of physical/chemical parameters of said lubricant; and a unit (3) for storing and processing the measured data, so as to provide information about the wear status of the mechanical members of the motor itself. <IMAGE>
