Abstract (en)
[origin: WO0136389A1] The invention relates to a method for producing N-substituted 2-pyrazoline-5-one of the general formula (I), wherein R is defined as per claim 1. Said method is characterised in that a compound of the general formula (II), wherein R, X and Y are defined as per claim 1, is reacted with a molar excess of alkali hydroxide at a high temperature in an aqueous reaction medium and the pH value is subsequently adjusted to ≤ 6 by adding an acid.
