Abstract (en)

[origin: WO0130828A1] Human chemokine beta -6 agonist and antagonist polypeptides and DNA encoding such polypeptides and a procedure for producing such polypeptides by recombinant techniques are disclosed. The chemokine beta -6 antagonists of the present invention may be employed to treat rheumatoid arthritis, lung inflammation, allergy, asthma , infectious diseases and to prevent inflammation and atherosclerosis. The chemokine beta -6 agonists and antagonists may be employed to myeloprotect patients undergoing therapy such as chemotherapy or radiation therapy.
