Abstract (en)

[origin: EP1230869A1] The applicator assembly (1) for a product (P) in stick form consists of an applicator element (7) of an at least partly compressible material with an aperture (13) to receive the stick product in a holder (30). The applicator is mounted on a support (2) which can be rotated relative to the stick holder to move the stick so that its end is on a level with the surface (9) of the applicator element.
