Abstract (en)  
[origin: EP1231325A2] A panel system for creating a temporary floor, which in particular can be walked on, over an area of ground, in particular over a building site. <??>The system comprises a plurality of substantially rectangular panels, which can be assembled, with their sides adjoining one another, to form a floor, and coupling means for releasably coupling adjacent panels in the region of their adjoining sides. <??>The system further comprises a support element, which is designed to rest - in the area of the adjoining sides of two panels which are to be coupled - on the area of ground beneath the panels. The coupling means are designed to create a coupling between the two panels which are to be coupled via the support element. <IMAGE> <IMAGE>
