Abstract (en)  
[origin: EP1231337A1] The surface finish, mainly comprising stainless steel sheeting, uses specially-shaped limiting strips (9) between the lower edges of wall panels and deck (1). The strips have inclined edges where they meet the deck and are fixed in place directly on the supporting material underneath with structural adhesives. The deck has a decorative surface finish, a coating of a transparent resin, and a layer of a non-scratch and wear-resistant product. The upper edges of the limiting strips are horizontal and are stuck directly to the structure above them.
