Abstract (en)

[origin: WO0136658A2] A method for evaluating states of biological systems comprising the steps of a) constructing a pathway comprising at least two molecules and their interaction network, b) measuring expression data with an appropriate experiment and measuring device and c) calculating a score for said pathway based on said experimental quantification of the amounts of molecules in said system, said score indicating an intensity of realization of said pathway in said state of said biological system.
