Abstract (en)
[origin: WO0139230A1] The invention relates to an electrical switchgear comprising several housing parts with certain functional divisions in which the switching elements are arranged. According to the invention, the housing of the switchgear is at least formed by a bottom shell (2) and an upper shell (3) which are separated from one another by a horizontal separating joint (5; 6). In addition, one or more intermediate shells (4) can be provided which are separated from the bottom shell (2), the upper shell (3) and from one another by horizontal separating joints (5; 6).
