Abstract (en)

The invention relates to a mould side system for concrete casts. The magnet unit (1) according to the invention has no movable parts, but the magnet (6) is a fixed component of the unit and detachment is carried out using a simple lever tool (15). The fastening of the mould side (2) to the magnet unit (1) takes place by a known slanted-notch (7) principle. According to an advantageous embodiment, the magnet unit (1) has two faces for fastening mould sides, whereby parallel sides of separate, adjacent moulds may be fixed using the same magnet. <IMAGE>
