Abstract (en)

[origin: EP1233137A2] An arrangement for sealing the lower end surface (1) of a door (2) comprises a hat or U-shaped guide profile (3) in the lower door face, as well as a vertically arranged sealing slat (5) with a carrier profile (6) and a sealing profile, and a sound damping agent. The sound damping agent is connected to the sealing profile, and is co-extruded with it.
