Abstract (en)
[origin: EP1233433A2] The switching device has a base (11) supporting at least one counter-contact (18) cooperating with a corresponding contact (17) supported by a contact holder (14), displaced relative to the base, with the contact force provided by a spring element (28) acting between the base and the contact holder. The spring element is secured to the base via holding elements (30) provided integral with the base or the contact holder.
