Abstract (en)  
[origin: WO0131034A1] The present invention relates to a newly identified protein, 27875, a human ADAM-TS (A Disintegrin And Metalloproteinase). In particular, the invention relates to 27875 ADAM-TS metalloproteinase polypeptides and polynucleotides, methods of detecting the 27875 ADAM-TS metalloproteinase polypeptides and polynucleotides, and methods of diagnosing and treating 27875 ADAM-TS metalloproteinase-related disorders. Also provided are vectors, host cells, and recombinant methods for making and using the novel molecules.
