Abstract (en)
[origin: WO0133245A1] Apparatus for testing a capacitive sensor, the apparatus including: means (5, 15, 17, 19) for applying a test input signal to the sensor, the test input signal having a predetermined signal characteristics; and means (7, 18) for extracting a test output signal from the sensor by selecting signals having the predetermined signal characteristics, and blocking signals not having the predetermined signal characteristics.
