Abstract (en)
[origin: EP1234615A2] Showerhead comprises at least one annular channel (21) having water outlet openings (20) and a blocking body (3) for the water outlet openings. The water flows into the annular channel tangentially or at an angle to the peripheral axis so that the blocking body rotates in the annular channel. The blocking body is positioned on at least two roller bodies (4) in the annular channel. Preferred Features: The blocking body covers one third to one quarter of the water outlet openings.
