Abstract (en)
[origin: EP1234796A1] Lift system comprises one or more bearer cables (4) driving the lift (1) and connecting the lift to a counterweight (2), a weight counterbalance element (7, 8) counterbalancing the lift and the counterweight, and at least one lift cable (16) provided with a supply and/or functional control line for the lift. The lift and the counterweight each have at least one weight counterbalance element. The weight counterbalance element (7) of the lift is combined with the lift cable. An Independent claim is also included for a weight counterbalance element with a combined lift cable for the lift of the above lift system. Preferred Features: The weight counterbalance elements are designed as hanging cables having one end (9, 10) connected to the lift or counterweight and one end (13, 14) connected to the support construction (3) of the lift system or a shaft wall of the building.
