Abstract (en)

[origin: US2001015026A1] Dryer-ironer with heated ironing cup and heat-carrying fluid. In a dryer-ironer with heated cup (10), the cup is built so as to define a closed chamber (26) containing a heat carrying fluid between two parallel walls (18, 22). The fluid is set -into motion through a stirring system integrated with the cup so as to provide the establishment of a uniform temperature along its entire length.
