Abstract (en)

[origin: WO0138095A1] The invention relates to an inking system for a printing machine, comprising an ink delivery roller. The aim of the invention is to provide an inking system of this type which ensures that the ink is guided in the inking system in a stable manner and which has a simple construction. To this end, an inking delivery roller (15) is allocated to a drivable inking system roller (14, 9), a gap (19) being maintained. At least one calendar roller (10) is allocated to said inking system roller (14 or 9).
