Abstract (en)

[origin: WO0138509A1] The invention relates to a method for the mutagenesis of eucaryotic nucleotide sequences, preferably from plants, algae and/or fungi and a method for the production of genetically modified eucaryotic cells. The subject of the invention is the genetically altered nucleotide sequences of the type disclosed, vectors containing such nucleotide sequences, as well as genetically altered eucaryotic cells, tissue and/or parts of plants, algae and/or fungi and/or regenerated whole plants and the use thereof.
