Abstract (en)

[origin: WO0129724A1] A method and an arrangement are suggested for handling of information regarding economic events with a paying party and a payment-receiving party. The arrangement includes at least a first computerised user interface (1, 2) for a first of said parties, a computer device (10) including a computer application with a data base (11) and at least a second computerised user interface (3, 4) for the second of said parties. The first user interface, the second user interface and the computer device are connected to a computer communication device (9). The computer device permits recording of information regarding such an event in said computer application and includes means for processing the information and transferring the processed information to a computerised bookkeeping system, which is associated with said first party.
