Abstract (en)

[origin: WO0141106A1] The invention is an adjustable 3D multicolor wave generator system comprising light source (5) and a color filtering means (8) which varies the color of the light. It further comprises a cord (3) which is attached by its first end to a cord holder (4) which permits the free rotation of the cord (3) within itself and serves as a fixed point for the wave generating rotating of the cord (3). The second end of the cord (3) is attached to a driven disc (7) rotating the cord (3) at a given radial distance from its center of rotation.
