Abstract (en)

An apparatus secures ventilation cloth (34) to a screen frame (30). A screen frame (30) is oriented in an approximately vertical position. The screen frame has a plurality of segments (30a-d). Each segment (30a-d) has a mounting surface (32a) on a face thereof. At least one of said segments (30a-d) has adhesive (36) on the mounting surface (32a) thereof. A ventilation cloth (34) is hung across the mounting surface (32a) of said one segment (30a-d). The adhesive (36) in said one of the segments (30a-d) is melted. The ventilation cloth (34) is inserted in the adhesive (36) across a length of said one of the segments (30a-d). <IMAGE>
