Abstract (en)

[origin: WO0130630A1] The invention relates to a rail mounted vehicle segment (20) comprising a supporting frame (20) on at least one pair of wheels, an outer shell (14) on said supporting frame (20), and bottom (42) inside said shell (14) for receiving fittings built into the vehicle, seats, etc. According to the invention, the bottom (42) is pivotally mounted about a longitudinal vehicle axis (46) extending in the direction of travel.
