Abstract (en)  
[origin: WO0125322A1] A foam component is provided which comprises a mixture of a polymeric material, a dissolution aid, and an active ingredient, preferably being active in an aqueous environment, the foam component being stable upon contact with air and unstable upon contact with water. Said foam component provides a means to deliver an active ingredient to an aqueous environment, preferably the active ingredients being a detergent active ingredient, preferably enzymes, and the aqueous environment being the wash water.
