Abstract (en)
[origin: EP1238587A2] The present invention relates to compositions suitable for use against one or more pathogens comprising at least one antagonistic micro-organism and at least one stimulating agent, which may be selected from the group consisting of one or more uronic acids, mannans, and/or derivatives thereof and mixtures of said agents. The invention also relates to a method for the biocontrol of diseases caused by pathogens to vegetal material using the compositions of the invention.
