Abstract (en)  
[origin: EP1238603A2] The interior of a first housing part (2) contains the cosmetic (3). The applicator (7) or applicator-holder (8) is joined to an operating bar (10) which penetrates outside through the closed rear end of the second housing-part (4). The operating-bar and applicator turn and slide longitudinally by means of the protruding section (14) or the cap (15) placed on the protruding section. One helical spring (18) is supported on a sealing-stopper (12); another helical spring (17') is supported on an inner shoulder (23) of the second housing part and on a shoulder (24) of the applicator-holder.
