Abstract (en)

[origin: EP1238622A2] The dishwasher comprises a control unit (5) with which the angular velocity of rotation of the spray mechanism (1) is adjustable with angle dependence. The control unit controls a circulating pump (6) which feeds an adjustable rinsing liquid quantity to the spray mechanism. The dishwasher has a position sensor (4) which registers the position of the spray unit and sends a position signal to the control unit. An Independent claim is also included for the control method of the dishwasher.
