Abstract (en)

[origin: EP1239085A2] The wire basket structure is composed of two grid units (2,3), locked together by a connector (14) formed by one of the grids without additional units. The connectors are shaped at the ends of the grid rods (8,9), as hooks or eyelets and the like, to lock against other grid rods. The wire basket structure can have a grid cover (7) unit.
