Abstract (en)

[origin: EP1239227A2] The hood has a suction fan and a body with a suction region and a vapor shield round it with service and indicator elements (5.1, 5.2), and a switch worked by a switching rod (4). This rod has at least two parts (4.1, 4.2) one behind the other, with a bend point (4.5) between them The parts are so arranged that the bent part will automatically revert to its initial position.
