Abstract (en)

A graphical main menu animation for security applications on portable electronic devices uses a data structure indicative of a graphical icon animated to show an opening of a secure receptacle receiving data personal to a user of the device for secure storage therein. Transport of the data into the graphical icon and closure thereof is indicative of secure storage. For instance, one or more symbols private to the user can process in an ordered pattern towards the security icon where they are illustrated as entering and being secured therein by virtue of being hidden from view.
