Abstract (en)

[origin: EP1239453A1] The method involves generating or selecting a time variable signal ($m(t)$), generating or selecting an imaging function (f) that forms an image of the signal as a sequence of real numbers and computing a sound signal ($o(t)$) by imaging the time variable signal using the imaging function. The time variable signal and/or the sound signal is computed in time discrete steps. Independent claims are also included for the following: an arrangement for implementing the method.
