Abstract (en)

This invention refers to Edison screw lamp holders with domes, fixing bracket or other clip-on device positioned longitudinally to the contact axis with anti-rotation stop provided by the bracket obtained by the outward elongation of the contact container wall, with the fixing clip on the lamp holder. It can be unfastened from the inside or from the outside depending on the dimensions of the Edison screw and having overall dimensions and development of rapid coupling spring contacts that are all the same. <IMAGE>
