Abstract (en)
[origin: WO0141603A1] A glide (20) includes a base (22), a front member, and a number of walls (26) extending front-to-back. Both the base and the front member are advantageously formed as a number of pieces secured side-by-side to provide expandability. The front member may be secured to the walls via dovetail interaction and different front members may be provided for different wall spacings.
