Abstract (en)

[origin: WO0141621A2] The invention relates to an improved drivable wagon, in particular embodied as a processing or a cleaning device which is suitable in particular for independent driving by the provision of at least one sensor device (13, 17). Said device can be at least be swung in unison with at least one steerable running wheel (7) and/or a swingable floor processing or cleaning unit or head (3).
