Abstract (en)

[origin: WO0141633A1] A universal instrument base assembly which is selectively engageable with a surgical retractor (40) includes a mounting plate (30) having a mechanical interface which releasably engages the surgical retractor and an instrument base plate (20) which includes a first portion which releasably engages the mounting plate and a second portion which releasably engages a surgical instrument. The mechanical interface of the mounting plate is adjustable to releasably engage a variety of different surgical retractors.
