Abstract (en)
[origin: WO0145573A1] Disclosed is a tongue cleaning device comprising a body having a handle and at one end thereof a head provided with a plurality of convex extrusions on at least one side of the head. Also disclosed is a tongue cleaning device comprised of a body having a handle and at one end thereof a head provided with at least one raised ridge. Also disclosed is a device wherein the head is further provided with tooth-cleaning bristles on the side of the head that is opposite to the side that is provided with the convex extrusions or with the at least one raised ridge. Still further disclosed is a tongue cleaning device comprised of a body having a handle and at one end thereof a head provided with tooth-cleaning bristles extending from the head on one side of the head, the tooth cleaning bristles further extending through the head to a height of up to about 7 mm on the opposite side of the head to form extension bristles for tongue cleaning.
