Abstract (en)
[origin: WO0140066A1] The invention relates to a packaging with a wall. Said packaging wall comprises at least one locally defined region of the external surface of the wall (2), which is made from a plastic of a different hardness from the plastic of the remaining part of the external surface of the wall (2). The above arrangement permits the use of the users sense of touch, so that the user can make out, blind and by touch, in particular the spatial position/orientation of the surface, without having to consider the geometry of the packaging.
