Abstract (en)
[origin: WO0146362A2] A laundry detergent composition comprises surfactant, builder, and optionally other non-bleach detergent ingredients, and also contains a low level of a polymer containing structural units of a condensation product of an amino acid (for example, aspartic acid) and an unsaturated dicarboxylic acid (for example, maleic acid). The composition provides improved maintenance of colour fidelity, especially of white or light-coloured fabrics, on laundering.
