Abstract (en)

[origin: WO0144560A1] An organic solvent-based dry cleaning composition, method and articles incorporating the same that are suitable for use in drying machines, such as hot air drying machines found in households, apartments, and laundromats, which are normally adapted to dry wet garments and the like from a washing machine. The composition includes at least one organic solvent and water, with the at least one organic solvent forming the greatest weight percentage of the active components in the composition. In some embodiments, the composition may also include at least one surfactant, emulsifier, perfume, and/or application-specific stain remover.
