Abstract (en)
[origin: WO0147067A1] The invention relates to a screwless terminal for use in installation engineering devices. Said terminal operates principally using a detachable clamping spring (1) which establishes a spring-loaded contact between a conductor (2) to be connected and a conductor bar (3). The invention is characterised in that a release body (5) co-operates with the clamping spring (1) in the release direction (4) of the spring to form part of a combined device for releasing several clamping springs.
