Abstract (en)
[origin: WO0147068A1] The invention relates to a screwless terminal which can be used in devices that are utilized in installation engineering and which functions, in principle, with a detachable terminal spring (1) that brings a conductor (2) to be connected into contact with a conductor rail (3) by means of spring force. The invention provides that a sliding wedge-shaped release body (5) is interactively connected to the terminal spring (1) or to a release pressure piece (4) in the direction of detachment thereof.
