Abstract (en)

[origin: EP1240986A2] The offset printing machine is combined with a stamping machine (1), which makes holes in a printed piece of paper. There is a large drum (2), carrying e.g. two stamping tools (4) with sharp edges. The tools press the paper sheets (6) against a smaller pressure drum (3), so that the sharp edges cut through the paper. The rotation of the drum then carries the paper under a suction hood (8) with nozzles (30) for pressurized air at the sides.
