Abstract (en)

[origin: US2003140474A1] The crimping head (2) is hinged, at the upper part, on a horizontal pin (4) mounted at the end of a connecting rod pivotally bearing on a central vertical post (12). This pin enables the head to adopt a position inclined towards the rear of the machine, through the action of a small jack (5), in such a way that its lower end is moved away from the shaped support block (6) serving to hold the fastener in position on the support plate (1) Application to the mounting of frame back fasteners.
