Abstract (en)

[origin: WO0130930A1] The invention concerns an anti-adherent silicone/adhesive complex comprising at least a silicone coating applied on a first support and an adhesive coating applied on a second support. The invention is characterised in that the silicone coating which is derived from a polyorganosiloxane oligomer or polymer with functional epoxy and/or alkenylether and/or oxetane and/or dioxolane groups comprises an adhesive designed to stabilise in the course of time the release force of a silicone/adhesive interface.
