Abstract (en)
[origin: WO0144424A1] A fabric care system comprising a radical initiator, which is preferably a photoinitiator and preferably selected from hydrogen abstraction photoinitiators, bond cleavage radical photoinitiators or mixtures thereof and a radical terminator is used to treat fabric, for example as a stain removal system in the washing or rinsing of fabric in a laundry process. The fabric treatment system can be incorporated into a fabric washing composition or a conditioner composition.
