Abstract (en)  
[origin: WO0150360A2] According to the invention, an efficient, error-resistant and manipulation-proof identification of an account number and/or of a caller can be carried out by a device and a method for automatically identifying an account number of a caller and/or the caller when the caller (1) initiates a dialing-in to or an account transaction (9) in a computer of a bank (5) via a telecommunications medium (3). The telephone number of the caller (1) is conveyed over the telecommunications medium (2, 3), whereby the account number of the caller (1) and/or the caller is identified based on the telephone number that at least partial corresponds thereto.
