Abstract (en)

The bracelet consists of two curved elastic branches (1, 2) of a synthetic rubber, overmoulded onto inserts (4, 5) of a non-compressible material such as a metal or thermoplastic fixed to the watch case (3) by screws (8). The elastic branches, which have a cross-section reducing towards their tips, can be injection-moulded and then vulcanised, and during the moulding process can be embossed with the maker's logo, marks of origin or decorations.

Abstract (fr)

Ce bracelet pour montre est constitué par deux branches élastiques cintrés (1, 2) en forme de C, constituées par du caoutchouc. Ce bracelet est réalisé par surmoulage du caoutchouc sur un insert (4, 5) en un matériau non compressible. <IMAGE>
