Abstract (en)

[origin: EP1243198A1] The key pouch (1) contains a slide (14), to which the key is attached by a cord (4). A lever (24, 34) attached to one end of the slide raises and lowers it along a guide rail (16) so that the key (2) is also raised and lowered. An Independent claim is included for a method for moving a key using the pouch.
