Abstract (en)  
[origin: EP1243207A1] One lengthwise side of the bed has at least one side-barrier which can be lowered and raised and comprise at least one roller-blind type length of material. At least two separate spaced apart roller blinds (10) made of textile, rubbery or plastic material, are positioned in the bed's lengthwise direction. The material is wound onto and off a shaft or roller at the side of the bed. Preferably two swivel arms are positioned behind and support the roller blind material.
