Abstract (en)
[origin: EP1243352A2] Clamping head of a plate stretcher comprises lamellae (3, 4) divided horizontally to the stretching plane (2) and surrounding the clamping throat (5) of the head with their complementary partial halves above and below the stretching plane. Preferred Features: A steel box (16) is arranged between the lamellae. The lamellae and the clamping throat are connected together using traverses (10, 11) through a pre-tensioned system.
